THE AGILENOW

Professional Scrum Master I (PSM I)

COURSE CURRICULUM & LEARNING GUIDE

Review the complete module outline below, including topics and learning outcomes. Practical exercises are The AgileNow learning activities; certification requirements remain governed by the relevant awarding body.

Module 1: Empiricism and Scrum values

Explore empiricism and scrum values through practical explanations and a course-relevant example.

Topics Covered

- Complex work
- Transparency, inspection and adaptation
- Commitment, focus, openness, respect and courage
- Applying evidence to decisions

Learning Outcome: Explain empiricism and scrum values and use the covered concepts to reason about a practical scenario.

Module 2: Scrum Team

Explore scrum team through practical explanations and a course-relevant example.

Topics Covered

- Product Owner accountability
- Scrum Master accountability
- Developers and cross-functionality
- Self-management

Learning Outcome: Explain scrum team and use the covered concepts to reason about a practical scenario.

Module 3: Scrum events

Explore scrum events through practical explanations and a course-relevant example.

Topics Covered

- Sprint purpose and timebox
- Sprint Planning and Sprint Goal
- Daily Scrum
- Sprint Review and Sprint Retrospective

Learning Outcome: Explain scrum events and use the covered concepts to reason about a practical scenario.

Module 4: Artifacts and commitments

Explore artifacts and commitments through practical explanations and a course-relevant example.

Topics Covered

- Product Backlog and Product Goal
- Sprint Backlog and Sprint Goal
- Increment
- Definition of Done

Learning Outcome: Explain artifacts and commitments and use the covered concepts to reason about a practical scenario.

Module 5: People and facilitation

Explore people and facilitation through practical explanations and a course-relevant example.

Topics Covered

- Self-managing teams
- Facilitating conversations
- Coaching versus directing
- Impediments and organizational support

Learning Outcome: Explain people and facilitation and use the covered concepts to reason about a practical scenario.

Module 6: Products with agility

Explore products with agility through practical explanations and a course-relevant example.

Topics Covered

- Product value
- Backlog management
- Forecasting and release planning
- Stakeholders and customers

Learning Outcome: Explain products with agility and use the covered concepts to reason about a practical scenario.

Module 7: Assessment preparation

Explore assessment preparation through practical explanations and a course-relevant example.

Topics Covered

- Official focus areas
- Scrum Guide revision
- Original practice questions
- Readiness gaps and timed practice

Learning Outcome: Explain assessment preparation and use the covered concepts to reason about a practical scenario.

Plan Your Learning

Discuss your experience and goals with our team. Confirm prerequisites, training format, materials, dates, fees and examination inclusion before booking. Course attendance is distinct from earning a certification. This guide is The AgileNow curriculum; it is not an official awarding-body syllabus.
