Workplace practice

04
REVIEW
Learning evidence

Shared foundations. Practical application. A programme built around your team.

DESIGNED FOR YOUR ORGANISATION

Dedicated employee group | Agreed learning objectives | Flexible delivery planning

START WITH A SHARED LANGUAGE

Build confidence before the core curriculum.

Who this programme is for

- Employees new to Scrum
- Cross-functional teams and stakeholders
- Managers seeking a basic framework overview

Foundation topics

- Complex work and iterative learning
- Scrum values and the three accountabilities
- The Sprint and its events
- Artifacts, commitments and usable value

What your team can develop

- Use consistent Scrum terminology
- Understand the purpose of each event
- Recognize the responsibilities of team members
- Participate in basic planning and feedback conversations

CORE LEARNING MODULES

Learn the concepts. Apply the reasoning.

MODULE 01

Introduction

- Feedback and complex work
- Agile values and principles
- Scrum purpose
- Empirical learning

Learning outcome: Explain introduction and use the covered concepts to reason about a practical scenario.

MODULE 02

Scrum Team

- Product Owner
- Scrum Master
- Developers
- Cross-functionality and self-management

Learning outcome: Explain scrum team and use the covered concepts to reason about a practical scenario.

CORE LEARNING MODULES

Learn the concepts. Apply the reasoning.

MODULE 03

Scrum events

- Sprint and Sprint Planning
- Daily Scrum
- Sprint Review
- Sprint Retrospective

Learning outcome: Explain scrum events and use the covered concepts to reason about a practical scenario.

MODULE 04

Artifacts and commitments

- Product Backlog and Product Goal
- Sprint Backlog and Sprint Goal
- Increment
- Definition of Done

Learning outcome: Explain artifacts and commitments and use the covered concepts to reason about a practical scenario.

CORE LEARNING MODULES

Learn the concepts. Apply the reasoning.

MODULE 05

Practical foundations

- Scrum values
- Original scenarios
- Common misconceptions
- Further learning and optional assessment routes

Learning outcome: Explain practical foundations and use the covered concepts to reason about a practical scenario.

FROM KNOWLEDGE TO ACTION

Make learning relevant to your workplace.

Course-specific team exercise

Create a simple product backlog, agree a Sprint purpose and distinguish completed usable work from partially finished activity.

Team goals	Foundations	Workplace practice	Learning evidence

Before training

Agree roles, experience levels and team objectives. Use an initial knowledge check to identify the foundations that need attention.

During learning

Combine explanations, guided discussion and team practice. Use learning materials and a separate practice mock to review understanding.

At completion

Agree a final learning assessment and feedback approach. Review what employees can explain and apply, rather than treating attendance as proof of competence.

A CLEAR SCOPE BEFORE YOU BEGIN

Know what your corporate programme includes.

- Course foundations before the core modules
- Employee materials and practical exercises
- A separate practice assessment and agreed final learning review
- Certification preparation options, where relevant
- Completion recognition and an employee gift plan agreed in the proposal

Certification is a separate decision

Training supports learning and preparation. Official certification is awarded by the relevant provider under its eligibility, assessment and exam rules. Exam vouchers, official courseware, retakes and certification charges are included only when expressly stated in the written proposal.

Source and scope

This is The AgileNow proposed learning outline, not a claim of provider authorisation or an official exam syllabus. Check certification details with the provider before booking.

LET US BUILD THE PROPOSAL TOGETHER

Turn your training requirement into a clear learning plan.

Discuss your employee group, learning goals and delivery requirements before agreeing the programme scope.

- Course or combination of courses
- Employee roles, experience and group size
- Business goals and expected workplace application
- Preferred delivery, location and dates
- Materials, assessment and certification requirements
- Employee gift preference and budget
