THE AGILENOW

PRINCE2 Foundation and Practitioner Version 7

COURSE CURRICULUM & LEARNING GUIDE

Review the complete module outline below, including topics and learning outcomes. Practical exercises are The AgileNow learning activities; certification requirements remain governed by the relevant awarding body.

Module 1: Method and context

Explore method and context through practical explanations and a course-relevant example.

Topics Covered

- Project characteristics
- Performance targets
- Business justification
- People, sustainability and digital context

Learning Outcome: Explain method and context and use the covered concepts to reason about a practical scenario.

Module 2: Principles and people

Explore principles and people through practical explanations and a course-relevant example.

Topics Covered

- Seven principles
- Project responsibilities
- Leadership and collaboration
- Stakeholder communication

Learning Outcome: Explain principles and people and use the covered concepts to reason about a practical scenario.

Module 3: Seven practices

Explore seven practices through practical explanations and a course-relevant example.

Topics Covered

- Business case and organizing
- Plans and quality
- Risk and issues
- Progress

Learning Outcome: Explain seven practices and use the covered concepts to reason about a practical scenario.

Module 4: Seven processes

Explore seven processes through practical explanations and a course-relevant example.

Topics Covered

- Starting up and initiating
- Directing and controlling stages
- Managing product delivery
- Stage boundaries and closing

Learning Outcome: Explain seven processes and use the covered concepts to reason about a practical scenario.

Module 5: Practitioner application

Explore practitioner application through practical explanations and a course-relevant example.

Topics Covered

- Scenario interpretation
- Tailoring to complexity
- Tolerances and exceptions
- Integrating practices and processes

Learning Outcome: Explain practitioner application and use the covered concepts to reason about a practical scenario.

Module 6: Assessment preparation

Explore assessment preparation through practical explanations and a course-relevant example.

Topics Covered

- Foundation knowledge checks
- Practitioner scenario reasoning
- Accepted prerequisite verification
- Permitted reference material and exam guidance

Learning Outcome: Explain assessment preparation and use the covered concepts to reason about a practical scenario.

Plan Your Learning

Discuss your experience and goals with our team. Confirm prerequisites, training format, materials, dates, fees and examination inclusion before booking. Course attendance is distinct from earning a certification. This guide is The AgileNow curriculum; it is not an official awarding-body syllabus.
