THE AGILENOW

PRINCE2 Foundation Version 7

COURSE CURRICULUM & LEARNING GUIDE

Review the complete module outline below, including topics and learning outcomes. Practical exercises are The AgileNow learning activities; certification requirements remain governed by the relevant awarding body.

Module 1: Project foundations

Explore project foundations through practical explanations and a course-relevant example.

Topics Covered

- Project characteristics
- Performance targets
- Benefits and business justification
- People and sustainability

Learning Outcome: Explain project foundations and use the covered concepts to reason about a practical scenario.

Module 2: Principles and people

Explore principles and people through practical explanations and a course-relevant example.

Topics Covered

- Seven principles
- Roles and responsibilities
- Leadership and collaboration
- Stakeholder communication

Learning Outcome: Explain principles and people and use the covered concepts to reason about a practical scenario.

Module 3: Management practices

Explore management practices through practical explanations and a course-relevant example.

Topics Covered

- Business case and organizing
- Plans and quality
- Risk and issues
- Progress

Learning Outcome: Explain management practices and use the covered concepts to reason about a practical scenario.

Module 4: Management processes

Explore management processes through practical explanations and a course-relevant example.

Topics Covered

- Starting up and initiating
- Directing and controlling stages
- Managing product delivery
- Stage boundaries and closing

Learning Outcome: Explain management processes and use the covered concepts to reason about a practical scenario.

Module 5: Foundation preparation

Explore foundation preparation through practical explanations and a course-relevant example.

Topics Covered

- Terminology
- Management products
- Original knowledge checks
- Study planning and exam guidance

Learning Outcome: Explain foundation preparation and use the covered concepts to reason about a practical scenario.

Plan Your Learning

Discuss your experience and goals with our team. Confirm prerequisites, training format, materials, dates, fees and examination inclusion before booking. Course attendance is distinct from earning a certification. This guide is The AgileNow curriculum; it is not an official awarding-body syllabus.
