THE AGILENOW

PRINCE2 Practitioner Version 7

COURSE CURRICULUM & LEARNING GUIDE

Review the complete module outline below, including topics and learning outcomes. Practical exercises are The AgileNow learning activities; certification requirements remain governed by the relevant awarding body.

Module 1: Readiness and interpretation

Explore readiness and interpretation through practical explanations and a course-relevant example.

Topics Covered

- Accepted prerequisites
- Project context
- Scenario facts and assumptions
- Assessment question interpretation

Learning Outcome: Explain readiness and interpretation and use the covered concepts to reason about a practical scenario.

Module 2: Applying principles

Explore applying principles through practical explanations and a course-relevant example.

Topics Covered

- Business justification
- Learning from experience
- Defined responsibilities
- Management by exception and tailoring

Learning Outcome: Explain applying principles and use the covered concepts to reason about a practical scenario.

Module 3: Applying practices

Explore applying practices through practical explanations and a course-relevant example.

Topics Covered

- Business case and organization
- Plans and quality
- Risk and issue responses
- Progress and tolerances

Learning Outcome: Explain applying practices and use the covered concepts to reason about a practical scenario.

Module 4: Applying processes

Explore applying processes through practical explanations and a course-relevant example.

Topics Covered

- Initiation and authorization
- Stage control
- Product delivery interfaces
- Exception situations and closing

Learning Outcome: Explain applying processes and use the covered concepts to reason about a practical scenario.

Module 5: Tailoring and preparation

Explore tailoring and preparation through practical explanations and a course-relevant example.

Topics Covered

- Adapting management products
- Balancing governance and delivery
- Original scenario exercises
- Permitted reference material

Learning Outcome: Explain tailoring and preparation and use the covered concepts to reason about a practical scenario.

Plan Your Learning

Discuss your experience and goals with our team. Confirm prerequisites, training format, materials, dates, fees and examination inclusion before booking. Course attendance is distinct from earning a certification. This guide is The AgileNow curriculum; it is not an official awarding-body syllabus.
