

SAFe Product Owner/Product Manager Training

COURSE CURRICULUM & LEARNING GUIDE

Review the complete module outline below, including topics and learning outcomes. Practical exercises are The AgileNow learning activities; certification requirements remain governed by the relevant awarding body.

Module 1: Product roles and value

Explore product roles and value through practical explanations and a course-relevant example.

Topics Covered

- Product Owner and Product Management responsibilities
- Customers and stakeholders
- Customer centricity
- Value streams and ART context

Learning Outcome: Explain product roles and value and use the covered concepts to reason about a practical scenario.

Module 2: Vision and backlogs

Explore vision and backlogs through practical explanations and a course-relevant example.

Topics Covered

- Product vision and goals
- Roadmaps
- Features, stories and acceptance criteria
- Backlog ordering and refinement

Learning Outcome: Explain vision and backlogs and use the covered concepts to reason about a practical scenario.

Module 3: PI Planning preparation

Explore pi planning preparation through practical explanations and a course-relevant example.

Topics Covered

- Planning inputs
- Priority and capacity conversations
- Dependencies and risks
- Objectives and alignment

Learning Outcome: Explain pi planning preparation and use the covered concepts to reason about a practical scenario.

Module 4: Iteration execution

Explore iteration execution through practical explanations and a course-relevant example.

Topics Covered

- Clarification and acceptance
- Planning and review
- System demos and feedback
- Change and expectation management

Learning Outcome: Explain iteration execution and use the covered concepts to reason about a practical scenario.

Module 5: Outcomes and responsible AI

Explore outcomes and responsible ai through practical explanations and a course-relevant example.

Topics Covered

- Product outcome measures
- Inspect and Adapt contributions
- AI-assisted research and drafts
- Privacy and human validation

Learning Outcome: Explain outcomes and responsible ai and use the covered concepts to reason about a practical scenario.

Plan Your Learning

Discuss your experience and goals with our team. Confirm prerequisites, training format, materials, dates, fees and examination inclusion before booking. Course attendance is distinct from earning a certification. This guide is The AgileNow curriculum; it is not an official awarding-body syllabus.
